personal_summary

Software Developer with a strong growth-mindset, dedicated to making a positive impact through collaborative work. Whether the intention is to streamline processes, provide documentation, or to broaden my own skill set I take value and have been motivated by innovation and continued learning. Being comfortable with change, ambiguity and adaptability have been key to finding my successes in my past positions. My hunger for constant growth and learning is what attracted me to the tech space.

teck_stack = [

```
{ Front-End Languages and Frameworks: React,
JavaScript, HTML, CSS },
{ Back-End: Node.js, Express, PostgreSQL },
{ Test Suites: Jest, QUnit },
{ CI Tools: Git, Heroku & Heroku Scheduler, Postman },
{ Dev Practices: Pair/Mob Programming, TDD }
```

];

career_summary

BSM Consulting (2019-2020)

Accounting Specialist

Reduced time and costs while increasing efficiency by introducing new accounting procedures. Restructured Cost Accounting practices and created efficiencies for account reconciliations.

Incline Property Management (2018-2019)

Staff Accountant

Modernized and streamlined department processes by digitizing files, communications, payments, and deposits. Created training documentation for onboarding new department employees.

IT Convergence (2014-2018)

Staff Accountant (2014-2018)

Senior Administrator - Finance (2014-2017)

Accounts Payable Analyst (2014-2014)

Promoted three times in four years. Consistently demonstrated a high level of proactiveness: acted as interim Payroll Administrator for seven months while retaining role as Senior Finance Administrator and managing department staff; wrote company-wide documentation for onboarding new department employees; wrote revisions to US employee expense policy guidelines.

projects

Traktion - [Github](#)

Node.js | PostgreSQL | AWS Rekognition | Twilio

A backend SMS-based habit tracking app that promotes healthy habits and gives users a means for accountability. Created during a week sprint with remote team. Written in PostgreSQL and JavaScript and utilizes Twilio and AWS Rekognition tools. Primary contributions include SQL tables and their related models and queries. Mobbed and/or pair-programmed on complex functionality. Created wireframes with Balsamiq during planning phase.

OCTOGOTCHI - [Website](#) | [Github](#)

JavaScript | HTML | CSS

A fully frontend fun, nostalgic, and interactive game that gives a nod to the classic tamagotchi. Created during a week sprint with remote team. Worked primarily as a designer and worked to conform to UX and accessibility design standards. Created custom sprites and GIFs via Piskel app.

OREGON ENVIRONMENTAL INITIATIVE - [Website](#) | [Github](#)

React.js | JavaScript | RestAPI

A full-stack React.js app that explores the depths of environmental change across Oregon using a third-party API. Created during a week sprint with remote team. Worked with grid to style the Home page and used React-tiny-link for resource previews. Other libraries utilized include: react-simple-maps, react-slider, reactjs-popup.

academic_history

Alchemy Code Lab - Portland, OR (remote)

Professional Full Stack JavaScript Program (2021)

Intensive 1200+ hour training program focused on modern programming languages and development methods. Emphasis on Test-Driven Development and clean code. Experience with working on (remote) team projects and pair-programming.

University of California, Santa Cruz

Bachelors Degree - Anthropology (2004)

Extensive research and practical lab work in different fields of anthropology including: cultural, medical, forensic, and evolutionary ecology.
